

EDUCATION

- Pandit Deendayal Energy University (PDEU)

2023 – 2027

B.Tech Computer Science Engineering

Gandhinagar, Gujarat

– CGPA: 8.63 | Relevant Coursework: Computer Networks, Operating Systems, Information Security, DBMS, Cloud Computing, AI/ML, Data Structures & Algorithms

EXPERIENCE

- Cyber Forensics Intern

June 2024 – Jan 2025

Forensic Knight

Online

– Performed digital evidence collection, log analysis, and chain-of-custody documentation across multiple cybersecurity case investigations; maintained forensic integrity of evidence throughout entire investigation lifecycle.

– Conducted malware artifact analysis and suspicious network traffic investigation; applied OSINT techniques and file system forensics to extract volatile and non-volatile evidence from compromised systems.

TECHNICAL PROJECTS

- AEGIS — Adaptive Enforcement & Guardian Intelligence System | Python, FastAPI, React.js, SQLite

– Built a unified cybersecurity platform with three core modules: **TrustChain** (SHA-256 hash-chained tamper-evident logs + HMAC integrity verification), **VaultRun** (AST-based static code analysis + runtime CPU/memory sandboxing), and **HoneySight** (multi-type honeypots with behavioral attack analysis and severity-based real-time alerting).

– Integrated all modules into a live dark-themed SIEM dashboard with persistent SQLite storage, auto-refreshing threat feeds, and correlated incident timelines enabling unified threat visibility across all attack surfaces.
- SentinelAI — Intelligent WAF & Threat Detection System | Python, FastAPI, React, PostgreSQL, Redis, Docker, scikit-learn

– Engineered a production-grade AI-powered Web Application Firewall with full **OWASP Top 10** coverage across 17 detection modules; implemented ML anomaly detection using Isolation Forest and Logistic Regression for zero-day pattern identification, automated IP blocking, and behavioral traffic fingerprinting.

– Deployed real-time SIEM with WebSocket feeds, GeoIP threat mapping, and AI-powered attack explanations; integrated **AbuseIPDB** and **VirusTotal** APIs for enriched Indicator of Compromise (IOC) analysis and threat intelligence correlation.
- Swagat Caterers — Secure Full-Stack Enterprise Platform | Django, Express.js, PostgreSQL, HTML, CSS, JavaScript, Bootstrap

– Developed full-stack catering management platform with security-first design: JWT-based Role-Based Access Control (RBAC), secure session management, input sanitization against SQLi/XSS/CSRF, and parameterized queries to prevent injection attacks.

– Implemented bilingual event scheduling, billing, and reporting modules; enforced strict server-side validation and rate limiting to mitigate brute-force and enumeration attack vectors.

TECHNICAL SKILLS

Security & Networking: OWASP Top 10, VAPT, Threat Detection, Incident Response, Digital Forensics, Malware Analysis, Log Analysis, SIEM, Honeypots, IDS/IPS, Firewall, Network Security, TCP/IP, DNS, HTTP/HTTPS

Cybersecurity Tools: Wireshark, Nmap, Burp Suite, Kali Linux, OWASP ZAP, Metasploit

Languages: Python (Advanced), Java, C/C++, JavaScript, SQL, Bash

Frameworks & Databases: FastAPI, Django, Flask, React.js, Node.js, Express.js | PostgreSQL, MySQL, SQLite, MongoDB

Developer Tools: Git, Docker, VS Code, Postman, Linux Terminal

Soft Skills: Leadership, Problem Solving, Team Collaboration, Communication

CERTIFICATIONS

DCSC – Drop Certified Security Course: Web Application Penetration Testing & Security Assessment

2025

HackingFlix Academy – Certified Cyber Warrior (Cert ID: 85338496302599)

Oct 2025

Forage Job Simulations – Mastercard Cybersecurity, AIG Shields Up, Deloitte Australia Cyber (Phishing Investigation, Risk Analysis, Threat Detection)

2024 - 2025

Linux Foundation – Cybersecurity Essentials (LFC108)

2025

Oracle Cloud Infrastructure 2025 – AI Foundations Associate

2025

Google Cloud Skill Badges – Networking Track, Build Secure Cloud Network, Secure Data Lake, AI/ML Track

Dec 2025–Jan 2026

POSITIONS OF RESPONSIBILITY & ACHIEVEMENTS

- Vice President, Society of Mathematics (SOM), PDEU

2025 – Present

– Led planning and execution of 30+ academic events, workshops, and competitions reaching 200+ students; progressed from Graphic Design Member to Head to Vice President within 2 years.

– Coordinated cross-functional teams for event operations, student engagement, and outreach; promoted analytical thinking and technical skill development through mathematics and computing initiatives.
- GATE Qualified – Graduate Aptitude Test in Engineering (Computer Science)

2026
- Hackathon Winner – AETRIX Built a full-stack solution under time constraints at 36 hour continuous hackathon

2026
- Hackathons – Participated in HackOut’25, CodeClash, Sparkathon Converge, ISRO Hackathon

2024 – Present
